

Thirteen modules. Thirteen *flows*.

कर्तव्य · Kartavaya

One place to run an Indian business – CRM, GST invoicing, sales orders, signatures, HR, attendance, payroll, marketing, WhatsApp, messaging, AI and reporting. This document shows, one page at a time, what actually happens inside each of them.

How to read a page · the flow runs left to right in five steps

Families · Revenue People Conversation Intelligence

By · Aekam Inc · built in India, hosted in Singapore

Three spines, and two modules that cross all of them.

SPINE ONE

Money, end to end

- **Graha** ग्रह the company
- ↓
- **Vikray** विक्रय what was agreed
- ↓
- **Ganit** गणित what was billed
- ↓
- **E-Sign** प्रमाण what was signed

A name becomes an order, an order becomes a GST-correct invoice, and the paperwork is signed against the same record. **Kray** क्रय runs the same money the other way, and settles in the same Ganit.

SPINE TWO

People, end to end

- **Manav** मानव who they are
- ↓
- **Pahchan** पहचान when they worked
- ↓
- **Vetana** वेतन what they are paid

The employee record feeds attendance; attendance totals the days; payroll computes PF, ESI, PT and TDS from both — and a different role approves the run.

SPINE THREE

Conversation, in and out

- **Prachar** प्रचार the firm sends
- ↓
- **Varta** वार्ता the customer replies
- ↓
- **Sanvaad** संवाद the firm decides

Outbound campaigns, a WhatsApp thread that keeps both directions together, and internal discussion anchored to the record it is about.

ACROSS ALL THREE

Sahayak सहायक · Dristi दृष्टि

Sahayak generates against your own data and states its cost on every run. **Dristi** reads across every module and writes to none of them. Neither owns a spine — they are what you point at the rest.

Graha ग्रह

Every rupee starts as a name. This is where the name is kept.

ENDPOINTS

THE FLOW

WHAT YOU GET

- **One record per company** — an invoice, an order and a signature all resolve back to it.
- A pipeline that **reports on itself**: velocity, conversion, forecast, source and rep performance.
- Territories, labels and lead scoring, so routing is a rule rather than a habit.

BUILT IN

- **Approval-gated stages** — the deal waits for a person, and the wait is a row.
- **Duplicate merge with undo** — a wrong merge is reversible, not archaeology.
- Inbound lead and inbound email capture, scored on arrival.

ENDPOINTS

THE FLOW

WHAT YOU GET

- The step between **won** and **billed** stops being email.
- Quotes and orders share one line-item model, so a quote becomes an order without re-entry.
- Targets and attainment read off real orders, not a parallel sheet.

BUILT IN

- **Order-to-invoice link** — the audit question "what was this billed as" has an answer.
- Discounts and delivery terms are fields, not free text in a PDF.
- Soft-deleted and draft rows are **excluded** from revenue figures.

CONNECTS TO

- Graha ग्रह
- Ganit गणित
- Dristi दृष्टि

Between a won deal and an invoice – the step where the number is agreed.

Ganit गणित

GST-correct, or it does not leave the building.

26

SCREENS

51

ENDPOINTS

THE FLOW

WHAT YOU GET

- The tax logic is **in the product**, so a junior raising an invoice raises a correct one.
- Unpaid invoices stay editable — a typo is a correction, not a credit note.
- Custom fields (PO number, client reference) travel onto the printed document.

BUILT IN

- **s.12(2)(a) place of supply**, derived from supplier and recipient GSTIN.
- **No payment gateway, by design** — money is confirmed at the bank, not by a webhook.
- GSTIN, PAN and TAN are **never mandatory to save** a client or an invoice.

CONNECTS TO

- Graha ग्रह
- Vikray विक्रय
- E-Sign प्रमाण
- Dristi दृष्टि

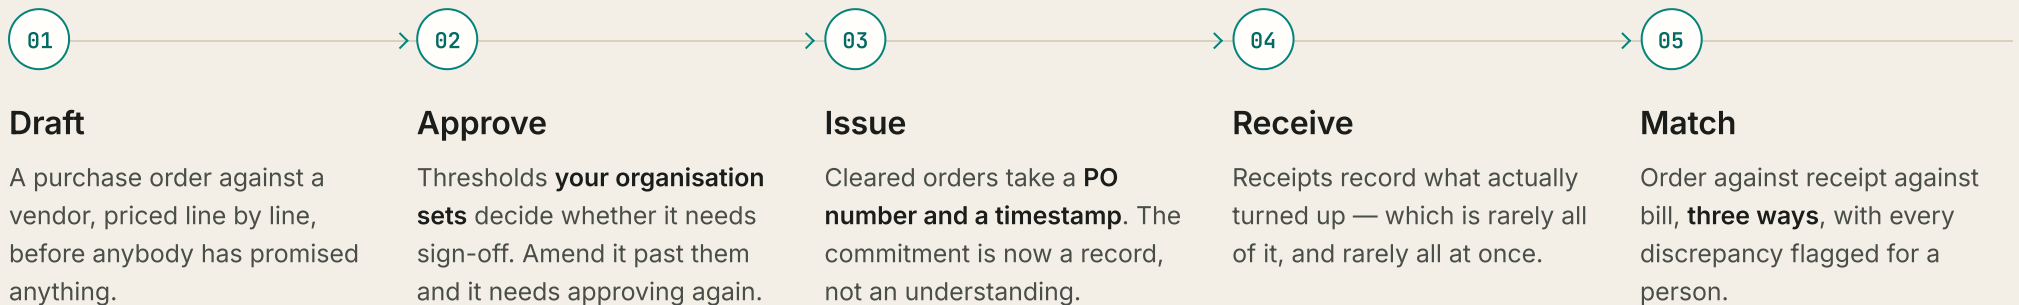

The end of the revenue spine, and the only place the tax treatment is decided.

Kray क्रय

Commit to the spend before it arrives as a bill.

4 21
SCREENS ENDPOINTS

THE FLOW

WHAT YOU GET

- **Committed spend** you can see while it is still a commitment, not after it is a bill.
- **Received not invoiced** — the period-end accrual, otherwise assembled by hand or not at all.
- Late suppliers reported rather than remembered.

BUILT IN

- **s.194Q warned at PO time** — vendors nearing the ₹50 lakh threshold, the rate read from the statute calendar **as of the date**.
- **The match approves nothing**. It surfaces exceptions; auto-approval is a decision for after you have watched it be right.
- Vendors and bills are Ganit's own tables — not a second copy of them.

CONNECTS TO

Ganit गणित

Vikray विक्रय

Dristi दृष्टि

The mirror of Vikray – विक्रय sells, क्रय buys. Both settle in Ganit.

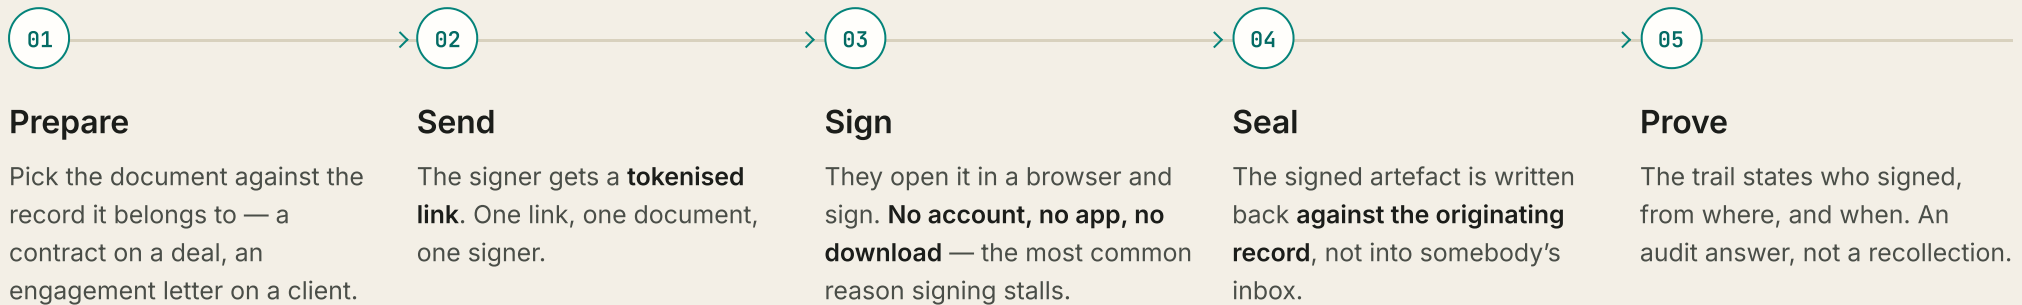

E-Sign प्रमाण

A signature with an address, a time, and a trail behind it.

4
SCREENS

THE FLOW

WHAT YOU GET

- Signing lives **next to the deal**, so chasing a signature is not a separate tool.
- The signed copy is filed automatically against the record that needed it.
- An audit trail you can hand over, rather than a screenshot of an email.

BUILT IN

- **Deliberately not Aadhaar** — no eKYC dependency, no third-party outage between you and a signature.
- Signer needs no login, which is what makes a first-time counterparty actually finish.
- Documents are stored in object storage; the record keeps the reference.

CONNECTS TO

Graha ग्रह Ganit गणित

*Attaches to whatever needs signing,
and files the signed copy back onto it.*

Manav मानव

Joiner to leaver, on one record.

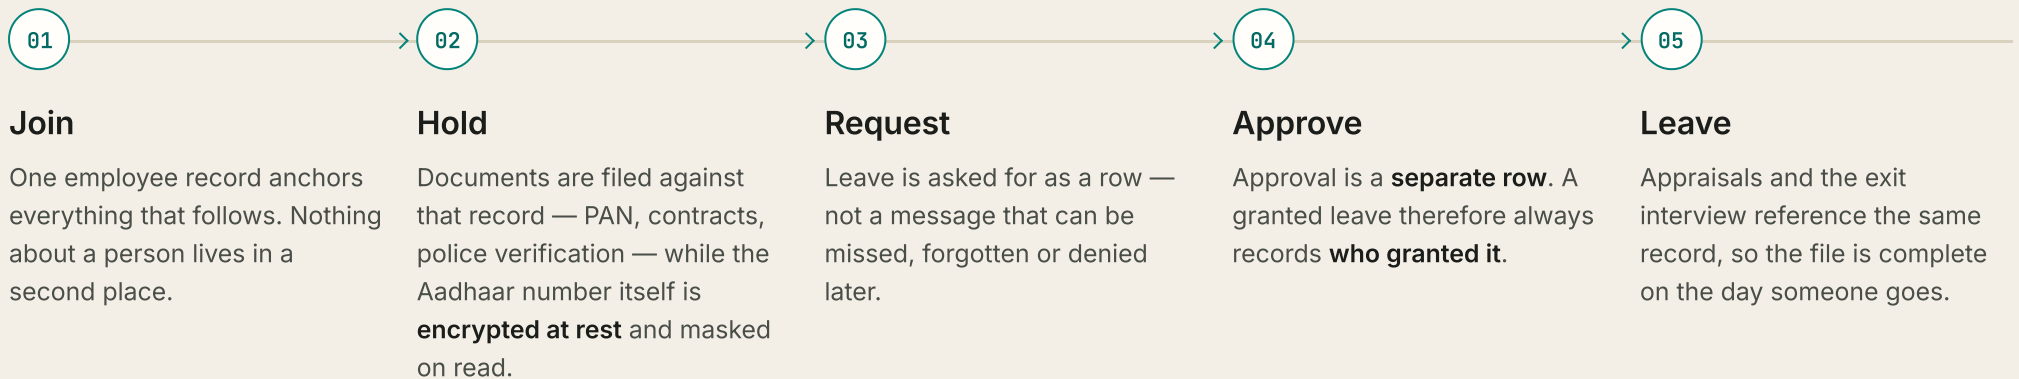

34

SCREENS

85

ENDPOINTS

THE FLOW

WHAT YOU GET

- A single record per person, from candidate through to exit interview.
- **Two-step leave**, so entitlement disputes have a name and a date attached.
- Documents filed against the person, and Aadhaar stored encrypted and masked — never a shared drive.

BUILT IN

- **Excluded from platform staff** by the role tiers — the vendor cannot read your employee records, and reading a colleague's documents needs admin.
- Data residency: Singapore, permanently.
- Feeds Vetana directly, so payroll draws from the HR record rather than a copy.

CONNECTS TO

Vetana वेतन

Pahchan पहचान

Dristi दृष्टि

*The head of the people spine.
Attendance and payroll both read
from this record.*

Pahchan पहचान

A punch that still works where the signal does not.

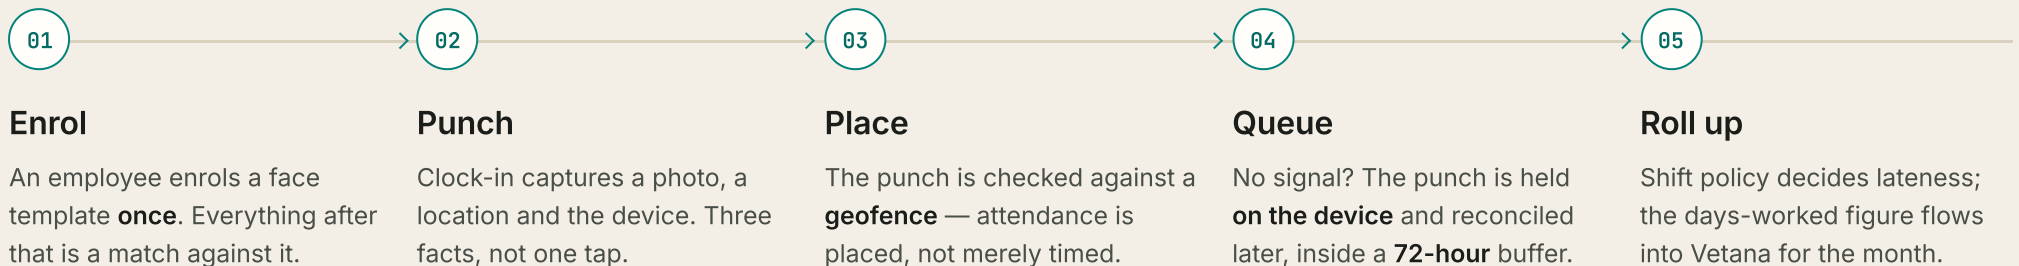

15

SCREENS

32

ENDPOINTS

THE FLOW

WHAT YOU GET

- Site and field staff can clock in where there is no network.
- **Face plus place** — the two questions a paper register cannot answer.
- The month's attendance arrives at payroll already totalled.

BUILT IN

- **Offline-first, 72-hour buffer** — the punch survives the dead zone.
- Shift policies decide lateness by rule, so the same lateness means the same thing in every branch.
- Attendance detail is visible only at the highest access tier, under DPDP.

CONNECTS TO

Manav मानव

Vetana वेतन

Between the employee record and the payroll run — it supplies the days.

Vetana वेतन

10

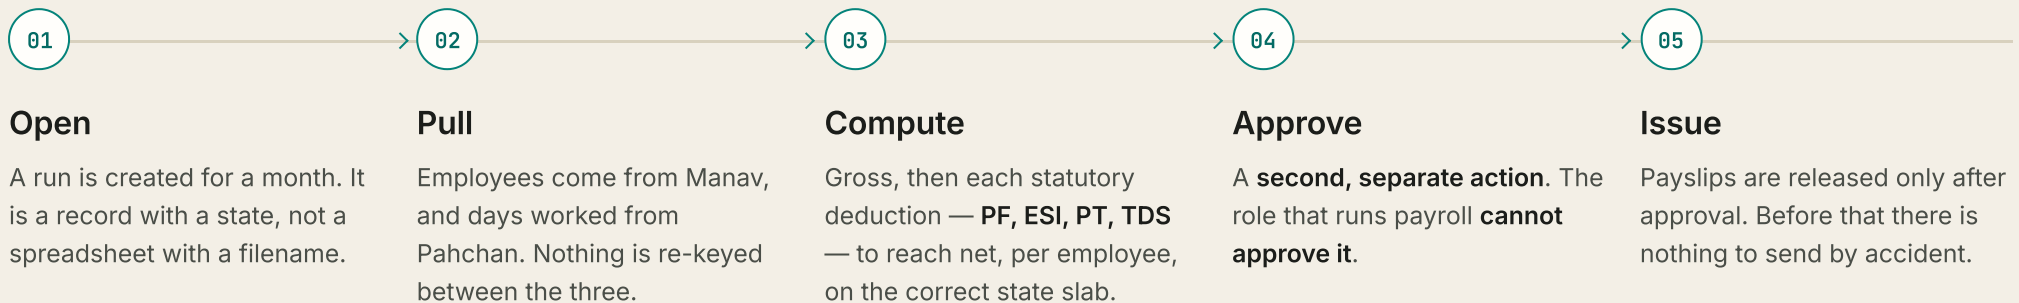

SCREENS

27

ENDPOINTS

PF, ESI, PT and TDS — computed by the product, approved by someone else.

THE FLOW

WHAT YOU GET

- Statutory Indian deductions computed rather than looked up.
- **Separated duty** built into the roles, which is the control an auditor asks about first.
- A run you can re-open and re-check before anybody is paid.

BUILT IN

- **PF on the statutory ceiling**, PT on the state slab — the arithmetic your CA would redo by hand.
- **Run and approve are different roles**, enforced by the product, not by trust.
- No payslip exists until approval, so a draft cannot escape.

CONNECTS TO

Manav मानव

Pahchan पहाचान

Ganit गणित

The end of the people spine. Nothing is paid without a second person.

Prachar प्रचार

Send it, then find out whether it worked.

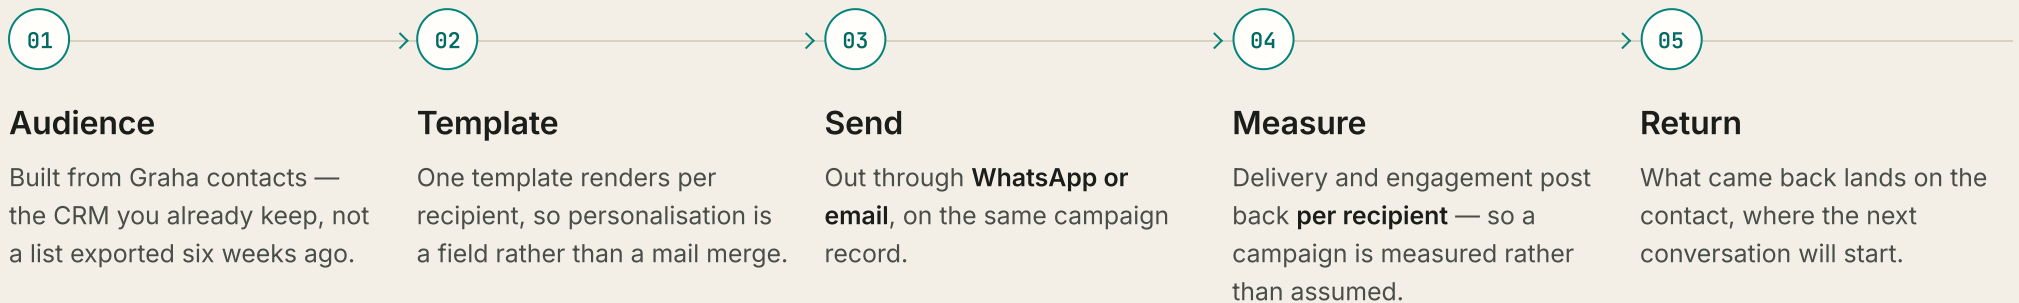

10

SCREENS

53

ENDPOINTS

THE FLOW

WHAT YOU GET

- Campaigns that read from the CRM, so the audience is never stale.
- **Per-recipient delivery** — you know who received it, not just how many.
- Templates and audiences are reusable objects, not one-off sends.

BUILT IN

- Outbound sits **opposite Sanvaad**: this is the firm talking out, that is the firm talking among itself.
- Engagement writes back to the contact record and can feed lead scoring.
- Paid-ad spend is tracked on the same campaign as the organic sends.

CONNECTS TO

Graha ग्रह Varta वार्ता
Dristi दृष्टि

The outbound half of the conversation spine.

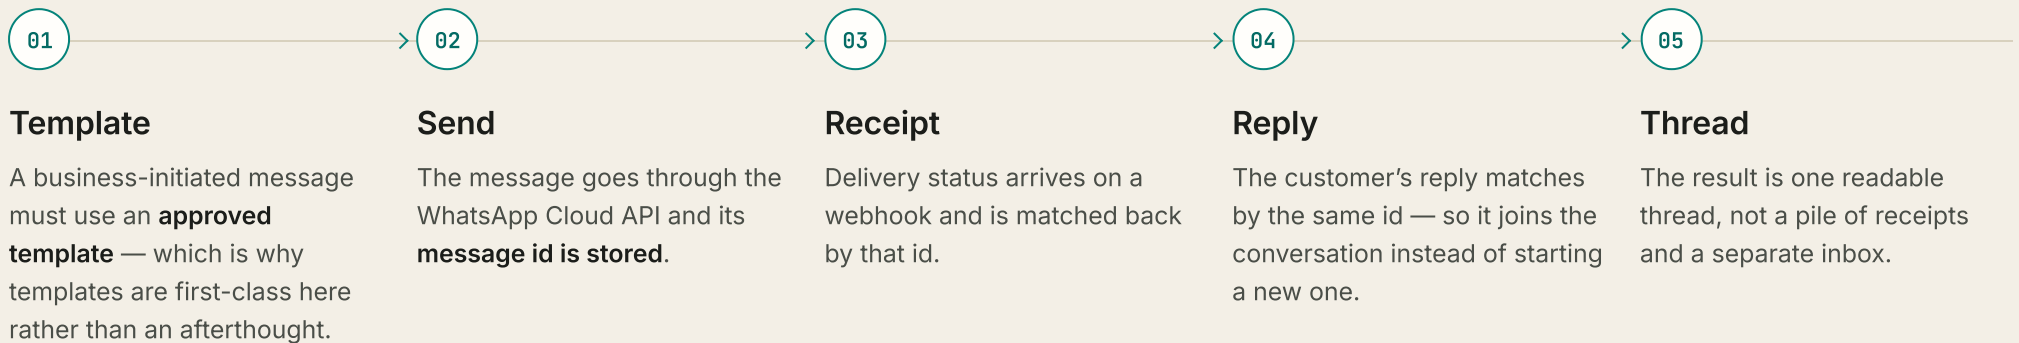

Varta वार्ता

One thread, both directions.

9
SCREENS

13
ENDPOINTS

THE FLOW

WHAT YOU GET

- The channel Indian customers actually answer, inside the system of record.
- **Replies land against the customer**, not in a phone somebody took home.
- Template management, because the platform will not deliver without it.

BUILT IN

- **Message id matching** — receipt, reply and send are one conversation by construction.
- Inbound arrives on a webhook, so a reply does not wait for a poll.
- Shares templates and audiences with Prachar rather than duplicating them.

CONNECTS TO

Prachar प्रचार Graha ग्रह

The channel Prachar sends through, and the one replies arrive on.

Sanvaad संवाद

Talk about the record, on the record.

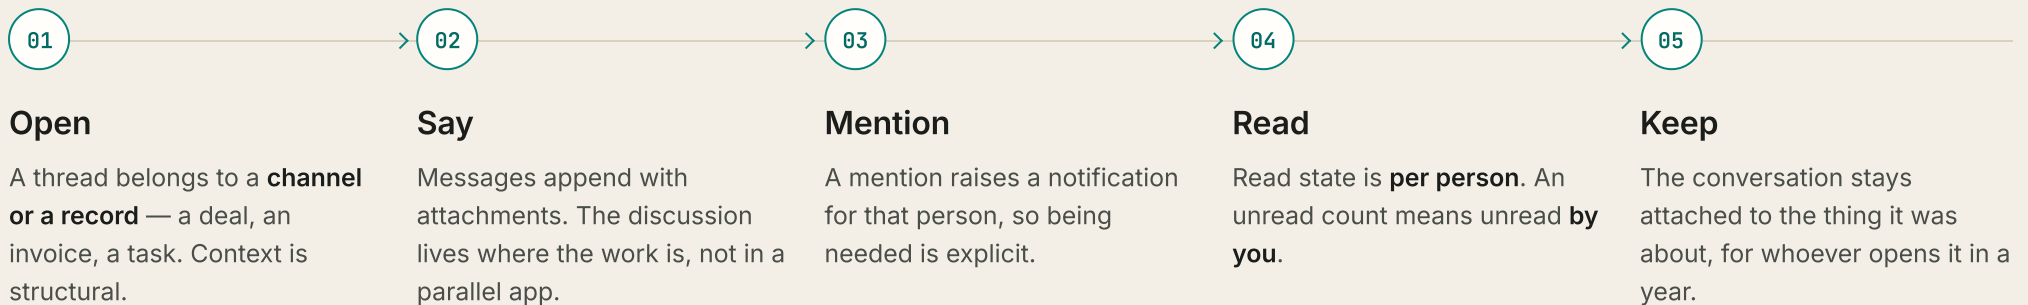

26

SCREENS

27

ENDPOINTS

THE FLOW

WHAT YOU GET

- The decision and the record it changed are **in the same place**.
- New joiners read the history instead of asking for it.
- Internal talk stays internal — Varta is the outside line, this is not.

BUILT IN

- Threads anchor to records, which is what makes the history worth keeping.
- Per-person read state, so a shared channel does not lie about what you have seen.
- Attachments live in object storage with the thread holding the reference.

CONNECTS TO

Graha ग्रह Ganit गणित
Manav मानव

The inward half – the firm talking to itself, against the record.

Sahayak सहायक

Every run says what it cost. Nothing is silently billed.

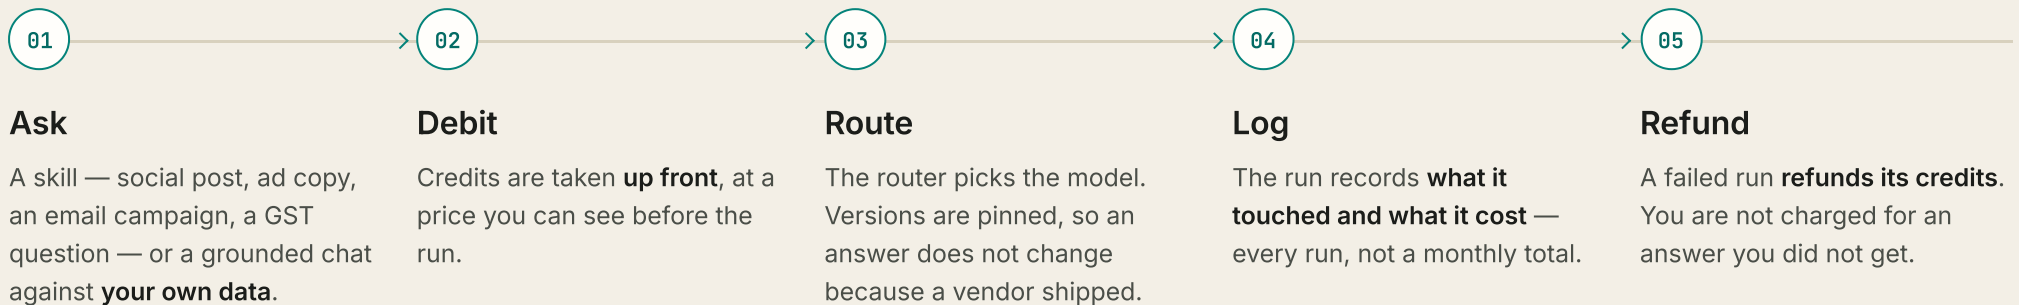

22

SCREENS

92

ENDPOINTS

THE FLOW

WHAT YOU GET

- AI priced in credits you can watch, instead of a bill that arrives later.
- Answers grounded in **your** clients, invoices and documents — not the open web.
- A skills catalogue that says who each skill is for and when to run it.

BUILT IN

- **Refund on failure**, and a per-run cost line. The spend is legible by design.
- **Pinned model versions** — no silent upgrade changing what your firm gets told.
- Web search is a dedicated search provider, so a citation is a real page.

CONNECTS TO

Graha ग्रह Prachar प्रचार
Ganit गणित

On no spine. It is what you point at every other module.

Dristi दृष्टि

Reads everything. Writes nothing.

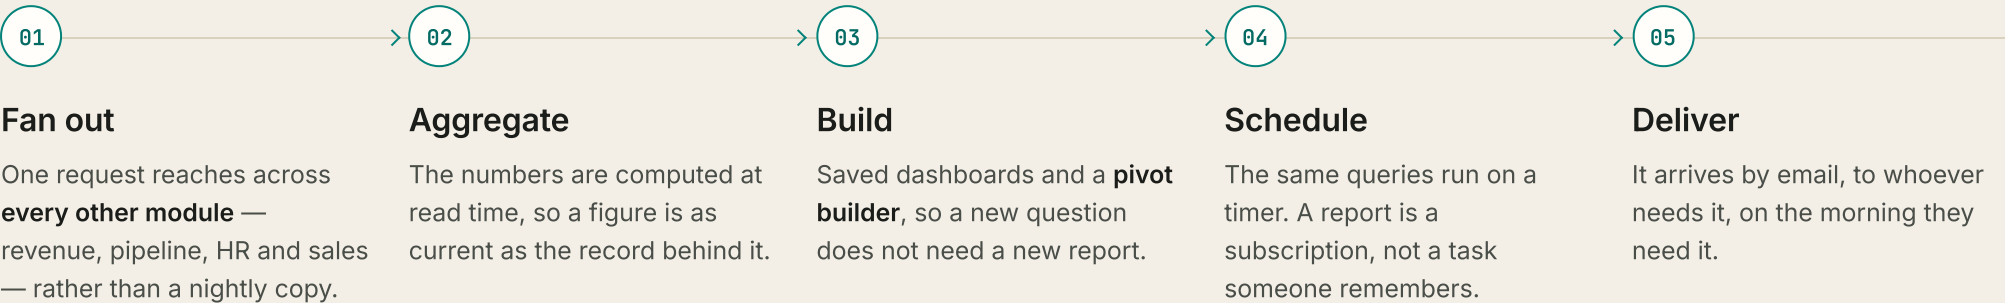

14

SCREENS

19

ENDPOINTS

THE FLOW

WHAT YOU GET

- One set of numbers for the whole firm, from the systems that produced them.
- **Scheduled delivery** — the partner gets Monday's figures without asking on Monday.
- A pivot builder for the question nobody anticipated.

BUILT IN

- **Read-only by construction** — no report can alter what it reports on.
- Drafts, credit notes and deleted rows are **excluded** from revenue, so a headline matches its own breakdown.
- Computed live across modules; there is no warehouse to fall behind.

CONNECTS TO

Every module

On no spine. It reads every other module and writes to none of them.
