ENDPOINTS

THE FLOW

WHAT YOU GET

- **One record per company** — an invoice, an order and a signature all resolve back to it.
- A pipeline that **reports on itself**: velocity, conversion, forecast, source and rep performance.
- Territories, labels and lead scoring, so routing is a rule rather than a habit.

BUILT IN

- **Approval-gated stages** — the deal waits for a person, and the wait is a row.
- **Duplicate merge with undo** — a wrong merge is reversible, not archaeology.
- Inbound lead and inbound email capture, scored on arrival.
